

MEETING MINUTES		
Project Name	Budget.io	
Meeting Name	Budget.io development	
Meeting Facilitator	Froillo Raquinio	
Meeting Details	Discuss project progress	
Meeting Invitees	Froillo Raquinio, Mazen Abid	
Minutes:		
Topic	Summary of Discussion/Decision	
Discuss how we can make a budgeting app that is superior considering there are already many out there.	In order to be better, we have decided to automate the input of data. Any financial decision the user makes is gathered and plugged into the database. This database is then used to make suggestions on how the user can be financially healthy.	
Discuss design constraints and requirements.	We have decided to focus on platform compatibility, database analysis, a user-friendly interface and goal tracking.	
Lo-fi prototypes		
Hi-fi prototypes	Prototype done on figma. Implementing lo-fi prototype key ideas. Shows the base look of the app and functions of it. Features that are the main focus of the project are explored. So far, it's user friendly and very efficient.	
Action Items:		
Description of Action	Assigned to	Date Required
Brainstorm ideas that could make the app more unique.	Froillo Raquinio	September 26,2023
Research requirements for a budgeting app.	Froillo Raquinio	September 28,2023
Filter the best ideas gathered from lo-fi prototypes.	Mazen Abid	October 5,2023
Translate hi-fi prototype(figma) into wix.	Mazen Abid	October 15,2023
